### **Tips for Parents and Teachers**

Parents and teachers play a vital role in supporting students' mathematical development. Here are a few tips to help you create a positive learning environment:

### **Engage in Math Talk**

Engage in math talk with students, using everyday situations. Ask your child questions about numbers, shapes, and measurements in real-world scenarios. This will help them make connections between math and their surroundings.

## Encourage Problem-Solving

Encourage students to think critically and solve problems on their own. Provide them with open-ended questions and puzzles that require them to apply their mathematical skills in different ways.

## Celebrate Success

Celebrate your child's successes, no matter how small. This will boost their confidence and motivate them to continue learning. Share their achievements with others and acknowledge their progress.
